

## The GEO Group Announces First Ever Community Corrections Contract Award for Wrist-Worn GPS Tracking Device BI VeriWatch™

March 8, 2023 11:00 AM EST

BI VeriWatch™ is the Latest in BI Incorporated's Continuum of Innovative GPS Tracking Systems

BI-VeriWatch-1BI-VeriWatch-2

BOCA RATON, Fla.--(BUSINESS WIRE)-- **The GEO Group (NYSE: GEO)** ("GEO") announced today that its wholly-owned subsidiary, BI Incorporated ("BI"), has been awarded a new five-year contract, inclusive of renewal options, by Santa Clara County, California for the use of BI VeriWatch™ ("VeriWatch"), representing the first ever community corrections contract involving this new cutting-edge technology developed by BI.

VeriWatch is a wrist-worn GPS tracking device that allows for real-time and discrete monitoring of individuals under community supervision by parole, probation, pretrial release, and other law enforcement agencies. VeriWatch is the first GPS tracking device in community corrections that uses biometric facial comparison technology to authenticate the identity of the individuals wearing the device. VeriWatch runs on a secure, custom operating system and offers multiple layers of tamper detection, an on-device camera, and an optical proximity sensor. VeriWatch also includes a clip-on transfer battery that enables the device to be charged on the go. Supervising officers can also send notifications and messages through VeriWatch, and the individuals wearing the device can read and acknowledge these communications, with a two-way feature that supports engagement and supervision compliance.

George C. Zoley, GEO's Executive Chairman, said, "VeriWatch is a game-changer for BI and community corrections and other law enforcement agencies as the device taps into state-of-the-art technology and a sleek design that mirrors today's consumer wrist-worn smart devices. We expect VeriWatch to expand the use of technology to enhance evidence-based best practices, which indicate that individuals actively involved in their supervision plan are better at meeting conditions of community supervision."

### About BI Incorporated

Established in 1978, BI Incorporated is a wholly owned subsidiary of The GEO Group, Inc. BI offers more than a dozen electronic monitoring systems for individuals under community supervision by parole, probation, pretrial release, and other law enforcement agencies. BI has Original Equipment Manufacturing (OEM) status and manufactures its products at U.S. facilities, employs more than 1,000 highly trained professionals nationally, and produces more than 200,000 electronic monitoring devices annually in Boulder, Colorado. BI offers a continuum of GPS monitoring systems including ankle bracelet, wrist-worn, and mobile biometric solutions to meet the varying risk level needs of government agencies. In addition, BI offers radio frequency (RF) curfew monitoring, alcohol detection, and voice verification systems; call center and operations monitoring services; and software solutions, including smartphone applications.

### About The GEO Group

The GEO Group, Inc. (NYSE: GEO) is a leading diversified government service provider, specializing in design, financing, development, and support services for secure facilities, processing centers, and community reentry centers in the United States, Australia, South Africa, and the United Kingdom. GEO's diversified services include enhanced in-custody rehabilitation and post-release support through the award-winning GEO Continuum of Care®, secure transportation, electronic monitoring, community-based programs, and correctional health and mental health care. GEO's worldwide operations include the ownership and/or delivery of support services for 102 facilities totaling approximately 82,000 beds, including idle facilities and projects under development, with a workforce of up to approximately 18,000 employees.
