### **Note to Reconciliation Tables and Supplemental Disclosure – Important Information on GEO's Non-GAAP Financial Measures**

Net Operating Income, EBITDAre, Adjusted EBITDAre, Funds from Operations, Normalized Funds from Operations, Adjusted Funds from Operations, and Adjusted Net Income are non-GAAP financial measures that are presented as supplemental disclosures. GEO has presented herein certain forward-looking statements about GEO's future financial performance that include non-GAAP financial measures, including Adjusted Net Income, FFO, Normalized FFO, and AFFO. The determination of the amounts that are excluded from these non-GAAP financial measures is a matter of management judgment and depends upon, among other factors, the nature of the underlying expense or income amounts recognized in a given period. While we have provided a high level reconciliation for the guidance ranges for full year 2018, we are unable to present a more detailed quantitative reconciliation of the forward-looking non-GAAP financial measures to their most directly comparable forward-looking GAAP financial

measures because management cannot reliably predict all of the necessary components of such GAAP measures. The quantitative reconciliation of the forward-looking non-GAAP financial measures will be provided for completed annual and quarterly periods, as applicable, calculated in a consistent manner with the quantitative reconciliation of non-GAAP financial measures previously reported for completed annual and quarterly periods.

Net Operating Income is defined as revenues less operating expenses, excluding depreciation and amortization expense, general and administrative expenses, real estate related operating lease expense, and start-up expenses, pre-tax. Net Operating Income is calculated as net income adjusted by subtracting equity in earnings of affiliates, net of income tax provision, and by adding income tax (benefit) provision, interest expense, net of interest income, loss on extinguishment of debt, depreciation and amortization expense, general and administrative expenses, real estate related operating lease expense, gain/loss on real estate assets, pre-tax, and start-up expenses, pre-tax.

EBITDAre (EBITDA for real estate) is defined as net income adjusted by adding provisions for income tax, interest expense, net of interest income, depreciation and amortization, and gain/loss on sale of real estate assets, pre-tax. Adjusted EBITDAre (Adjusted EBITDA for real estate) is defined as EBITDAre adjusted for net income/loss attributable to non-controlling interests, stock-based compensation expenses, pre-tax, and certain other adjustments as defined from time to time, including for the periods presented merger and acquisition ("M&A") related expenses, pre-tax, start-up expenses, pre-tax, legal related expenses, pre-tax, and escrow releases, pre-tax. Given the nature of our business as a real estate owner and operator, we believe that EBITDAre and Adjusted EBITDAre are helpful to investors as measures of our operational performance because they provide an indication of our ability to incur and service debt, to satisfy general operating expenses, to make capital expenditures and to fund other cash needs or reinvest cash into our business.

We believe that by removing the impact of our asset base (primarily depreciation and amortization) and excluding certain non-cash charges, amounts spent on interest and taxes, and certain other charges that are highly variable from year to year, EBITDAre and Adjusted EBITDAre provide our investors with performance measures that reflect the impact to operations from trends in occupancy rates, per diem rates and operating costs, providing a perspective not immediately apparent from net income attributable to GEO.

The adjustments we make to derive the non-GAAP measures of EBITDAre and Adjusted EBITDAre exclude items which may cause short-term fluctuations in income from continuing operations and which we do not consider to be the fundamental attributes or primary drivers of our business plan and they do not affect our overall long-term operating performance. EBITDAre and Adjusted EBITDAre provide disclosure on the same basis as that used by our management and provide consistency in our financial reporting, facilitate internal and external comparisons of our historical operating performance and our business units and provide continuity to investors for comparability purposes.

Funds From Operations, or FFO, is defined in accordance with standards established by the National Association of Real Estate Investment Trusts, or NAREIT, which defines FFO as net income/loss attributable to common shareholders (computed in accordance with United States Generally Accepted Accounting Principles), excluding real estate related depreciation and amortization, excluding gains and losses from the cumulative effects of accounting changes, extraordinary items and sales of properties, and including adjustments for unconsolidated partnerships and joint ventures. Normalized Funds from Operations, or Normalized FFO, is defined as FFO adjusted for certain items which by their nature are not comparable from period to period or that tend to obscure GEO's actual operating performance, including for the periods presented net Tax Cuts and Jobs Act ("TCJA") impact, M&A related expenses, pre-tax, loss on extinguishment of debt, start-up expenses, pre-tax, legal related expenses, pre-tax, escrow releases, pre-tax, and tax effect of adjustments to FFO.

Adjusted Funds From Operations, or AFFO, is defined as Normalized FFO adjusted by adding non-cash expenses such as non-real estate related depreciation and amortization, stock based compensation expense, the amortization of debt issuance costs, discount and/or premium and other non-cash interest, and by subtracting recurring consolidated maintenance capital expenditures.

Adjusted Net Income is defined as Net Income Attributable to GEO adjusted for certain items which by their nature are not comparable from period to period or that tend to obscure GEO's actual operating performance, including for the periods presented net TCJA impact, M&A related expenses, pre-tax, gain/loss on sale of real estate assets, pre-tax, loss on extinguishment of debt, start-up expenses, pre-tax, legal related expenses, pre-tax, escrow releases, pre-tax, and tax effect of adjustments to Net Income Attributable to GEO.

Because of the unique design, structure and use of our correctional facilities, we believe that assessing the performance of our correctional facilities without the impact of depreciation or amortization is useful and meaningful to investors. Although NAREIT has published its definition of FFO, companies often modify this definition as they seek to provide financial measures that meaningfully reflect their distinctive operations. We have modified FFO to derive Normalized FFO and AFFO that meaningfully reflect our operations.

Our assessment of our operations is focused on long-term sustainability. The adjustments we make to derive the non-GAAP measures of Normalized FFO and AFFO exclude items which may cause short-term fluctuations in net income attributable to GEO but have no impact on our cash flows, or we do not consider them to be fundamental attributes or the primary drivers of our business plan and they do not affect our overall long-term operating performance. We may make adjustments to FFO from time to time for certain other income and expenses that do not reflect a necessary component of our operational performance on the basis discussed above, even though such items may require cash settlement. Because FFO, Normalized FFO and AFFO exclude depreciation and amortization unique to real estate as well as non-operational items and certain other charges that are highly variable from year to year, they provide our investors with performance measures that reflect the impact to operations from trends in occupancy rates, per diem rates, operating costs and interest costs, providing a perspective not immediately apparent from Net Income Attributable to GEO.

We believe the presentation of FFO, Normalized FFO and AFFO provide useful information to investors as they provide an indication of our ability to fund capital expenditures and expand our business. FFO, Normalized FFO and AFFO provide disclosure on the same basis as that used by our management and provide consistency in our financial reporting, facilitate internal and external comparisons of our historical operating performance and our business units and provide continuity to investors for comparability purposes. Additionally, FFO, Normalized FFO and AFFO are widely recognized measures in our industry as a real estate investment trust.
